Steak and cuisine of a new dimension

If you have decided for a steak from our offer, we recommend you a Dry Aged Steak, which we mature ourselves for at least 30 days. The meat is selected from local farms.

DRY AGED STEAK

5,90 / 100 g

What is dry aged beef?

Dry aged steak is aged before consumption. Steak can be aged from 7 to even 120 days. The most common time frame for drying steak is 30 days.

The meat does not spoil during this time, as it is aged in conditions that strictly control the level of moisture, temperature and bacteria. During the drying process, the moisture is drawn from the meat, which makes the flavor of the beef even stronger and more aromatic. The aging process causes the beef's natural enzymes to break down the connective tissue in the meat, making it more tender while adding a nice nutty flavor to the beef.

Now to grill the meat. If you happen to be sitting in a restaurant that offers dry-aged steaks, we kindly ask you: **»Do not order meat over medium and take your time!«**

The dry aged steak was aged for a month or two in the maturing room. The farmer, the butcher and chef put their soul into it, and you paid for it. When we overcook the meat, it is a waste of both your meat and your money. Choose instead our marinated chicken, which is exquisite.

**A steak that will keep you up.
Now it is the time to try it!**
